SAIZAR

Automatic Strapping Machines

All our strapping machines can be adapted to any customer's needs regarding measurements, requirements, features, etc.

We manufacture strapping lines

We make automatic strapping machines for 16, 19, 25 and 32 mm tempered steel and polyester straps.

Each of our strapping machines can strap packages, bobbins, etc. with steel and with polyester. One automatic strapping machine can strap the same package with steel and polyester straps.

SAIZAR strapping machines can work with any type of steel strap as long as it is tempered. It can work equally well with straps from different brands such as Cyclop, Signode, Titan, Fromm, etc.

These days it is fundamental to be able to make savings in any part of your company's production process from buying the raw material to final despatch. That's why we are offering our services.

FLEJADORAS SAIZAR SL,

We are a global operator that can solve any strapping machine problems in your company, because at **FLEJADORAS SAIZAR** we specialise in manufacturing, repairing and maintaining all types of automatic, semi-automatic and manual strapping machines using steel and polyester straps.

The head has a hydraulic element to pull the strap. This means that **the strap can be tightened at the customer's chosen pressure** (right up to breaking the strap if necessary).

SAIZAR heads are standard and we work with 2 types of heads for steel and polyester straps:

- ▶ Head for 16 mm or 19 mm steel or polyester strap.
- ▶ Head for 25 mm or 32 mm steel or polyester strap

The tensioner can manage tighten the package at the pressure chosen by the customer. Therefore, **this tensioner can be regulated by the machine operator** depending on the package to be strapped.

Our jaw takes care of the process to hold, cut and staple the strap, which is done right on to the strap without any type of cartridge.

We can also provide the following services for our customers:

- ▶ 2 years quarterly maintenance monitoring free of charge
- ▶ 15 days training for the company's workers
- ▶ We are available for consultation and can supply all types of spare parts for strapping machines within 3 days.

All our strapping machines are delivered to their corresponding destinations ready to operate.

All our strapping machines run the whole process automatically and they are capable of strapping a package in barely 14 seconds. They all have the corresponding international patent.

We take care of everything: Repairs, maintenance and training

At **FLEJADORAS SAIZAR** we also **repair and maintain all types of automatic, semi-automatic and manual strapping machines.**

We repair all types of automatic and manual steel and polyester strapping machines made by Signode, Titan (Sorsa), Orgapack (Sundbirsta), Fromm, etc

Our service policy bypasses the normal situation when requesting a spare part from the official strapping machine manufacturer can take up to 30 days to arrive, leaving customers to do what they can to strap their packages, bobbins, etc. **Our service is the fastest.**

We promise to supply all types of spare parts for strapping machines within 3 days.

We promise to supply all types of spare parts for strapping machines within 3 days.

To avoid being dependent on one specific strap, **FLEJADORAS SAIZAR** modifies heads made by Signode, Titan (Sorsa), Orgapack (Sundbirsta), Fromm, etc, to be able to strap using any type of steel strap as long as it is tempered.

Several of our customers have already made great savings by introducing a more economical tempered strap made by other companies or by making the strap themselves.

FLEJADORAS SAIZAR guarantees and promises to be able to adapt any automatic strapping machine to any steel strap, as long as the strap is tempered.

FLEJADORAS SAIZAR gives official courses on the strapping machines which they use in their plant. These courses are useful to train machine operators, mechanics and electricians, broadening their knowledge and increasing efficiency levels.

If you want to find out what we can do for your company, you'll find us at **www.saizar.com**
